Your experience of the group Business Development Programme - Performance+

Very good indeed. Cleverly designed programme that suits small companies extremely well. Within two to three weeks everyone in the company was involved and committed to the programme. I felt a little disorientated at the start, but with each passing workshop I became more focussed, increased my knowledge and understanding of what was required and learned how to interpret each milestone to the benefit of the company.

Your experience of Amacus

The staff at Amacus were very helpful. Could not fault the programme or the people.

The benefits to your business

The programme helped us to clarify our view with what we wanted to do about the business and more importantly, how to achieve it.

Personally, it helped me to re-visit existing policies and documentation and put the same into a user friendly format for small business.

Staff feel more ownership. They are comfortable suggesting ideas for improvement at any time. They have grown in confidence and genuinely believe that they are valued member of the company.

A phrase to summarise your experience?

Happier workforce, inclusiveness. The programme has helped to make everybody feel they belong and are valued. They own it too.
